# ***Moatize Coal***

## ***Tete Mozambique***

### ***Initial Feasibility Study***

Mr. Errol Eldson  
AA Fund  
Geneva  
Switzerland

Maputo, 26<sup>th</sup>, June 2009

Dear Mr. Eldson

I write this letter to you on the request of my friend and colleague Mr. Hugh Brown of Hugh Brown & Associates (Pty) Ltd. Hugh and I have been involved as colleagues in the development of some projects in Mozambique more notably in the period 1991 until now, these include exploration of Pande and Temane natural gas fields involving Sasol and ARCO as well as the development of Moatize Coal Field in Tete Province and the port facilities in Savanna-Beira area.

Hugh's team, in the year 2000, were able to provide the Government of Mozambique in the case of the Moatize Coal Project, with sound geological, mining, power and infrastructure project plans and configurations, as well as with techno-economic modeling and feasibility studies that enabled the project to be further developed and implemented by the company CVRD of Brazil.

Yours sincerely,

*John William Kachamila*  
John William Kachamila

(Former Minister of Mineral Resources,  
Energy and Environment).
